WIR BIETEN

Tätigkeit

Arbeit: Testing Engineer (m/f) Mechatronic or Electrical (Ingenieur/in - Mechatronik) (alternativ: Ingenieur/in - Elektrotechnik (allgemeine Elektrotechnik), Hochschulabschluss: Nicht relevant, Forschungs- und Entwicklungsingenieur/in, Hochschulabschluss: Nicht relevant); ein offenes von ursprünglich einem gemeldeten Angebot; Sozialversicherungspflichtige Beschäftigung; Keine Führungsverantwortung

Stellenbeschreibung

NOTICE: This is one of the vacancies which are published in preparation of a recruitment event for the Stuttgart area. Selected applicants will be invited for interviews in Stuttgart (December 06 to 08, 2011). Travel and accommodation expenses will be paid from Barcelona (special flight) to Stuttgart and back.

Please only apply for this open position if your Spanish language is fluent and your German language skills match at least independent level (B2).

XX

What does a testing engineer do ?
What qualifications do you need ?

Successful candidates will

- plan tests / test series
- delegate and supervise partial testing
- carry out tests
- analyse and evaluate test results
- present test results

You will receive training in the following areas

- Systematic test engineering
- B&W creative and innovation methodology
- Verification and validation
- B&W project management

In the beginning

you will work for an experienced testing engineer who will impart you the basics of testing.
When you work on your own first testing projects you can continue to partake in the extensive know-how of our experienced testing staff.

What we expect from you?

Successful candidates should have profound technical knowledge and should be able to think laterally. In addition to that good communication skills are important. That is you can communicate and explain technical issues in a structured manner and understand customer expectations.

Your motivation is the driving force for your success and hence ours too
