PRODUCTION MEASURING TECHNOLOGY FOR THE BEST

We are one of the leading manufacturers for customised production measuring technology. Our spectrum ranges from simple manual measuring equipment through to fully-automated measuring systems. This is what our customers count on - the best automobile manufacturers and suppliers. We provide diversified responsibilities in a motivating environment as:

Electro engineer (m/f)

With creative ideas to function-oriented solutions

We provide a wide range of interesting responsibilities around the complete electronic engineering of highly-precise measuring equipment as well as their start of operation at our site and at the customer's site.

You develop measuring software using SPC-computers and build interfaces to quality control systems and measuring equipment. After having tested the complete system you accomplish the on-site start of operation of the measuring software. Services complete your area of responsibility.

You are an electrician and ideally have passed an apprenticeship before having graduated from your academic studies as electrician. Graduates are equally welcome as professionally experienced persons.

If you like to contribute to a small, modern family run company with 80 employees and you appreciate a direct contact and open doors, we should talk about your future at our company.

The payment is between `45-`50 T€ p.a. in depending to the work experience
The German language is necessary

We are looking forward to your application!
