

SENIOR SOFTWARE DEVELOPERS

in **UK, Germany and Finland**

We are looking for experienced **front-end and back-end developers** to work together with our Service and UX designers in our international projects. We are using modern JavaScript-based technologies, namely Angular.js and Node.js.

Find our official job ad for this position

here: http://leadin.fi/wordpress/wp-content/uploads/2017/01/leadin-senior_software_developers.pdf

TO BE A PART OF #LEADINCREW, YOU NEED:

- . A degree in computer science or software engineering
- . Experience on web application development
- . Experience on JavaScript technologies (Angular.js for a front-end developer, Node.js for a back-end developer)
- . Confidence using GIT version control

ALSO KNOWLEDGE OF

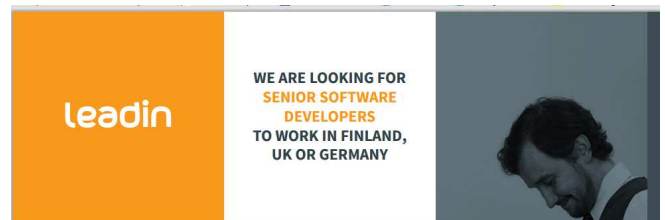

- Working on an Agile/Scrum team
- Automated software testing
- CI environments and DevOps
- Databases
- Full-stack

We offer you a chance to work with a caring, ambitious and most of all fun LeadinCrew. As an international company we also offer opportunities to work abroad and learn from other cultures. And let's not forget the range of benefits to keep you going!

You can choose to be located in **Finland, UK or Germany**. We welcome people from different cultures with open arms - as long as you speak English, you'll be fine.

Want to be the next member of LeadinCrew? Send your application via e-mail to: rekry@leadin.fi with copy to eures.nordicos@sepe.es, with subject: "EURES Senior Software Developer". We reply personally to every application.
