

Talented Robot Developer

BLUE OCEAN ROBOTICS ApS

Number of openings: 1

Advertisement publish date: 04/05/2017

Application deadline: 08/06/2017

Start date of employment: As soon as possible

Are you our new talented robot engineer?

If you want to be part of a fast growing, successful and highly innovative robotics company, where everything is possible, then you are reading the right job application.

At Blue Ocean Robotics we create and commercialise robots. We apply robot technology to create solutions and innovation for end-users and new businesses in partnerships. In Blue Ocean Robotics we are proud of creating tomorrow's robots, it can be robots like a patient-moving robot, a roboticized lobster farm or a UV-Disinfection robot. Robots which will create value and sense for humans, and we are very excited to have you on board as a robot engineer.

We expect you to be flexible and a fast learner, since we have a continuous flow of new projects and technical challenges. Our work environment is busy, dynamic, and full of great complex tasks, which needs to be solved by you and the team. You are structured as a person and like to work independently as a part of the robotics developer team, which is cross-functional and very international.

The ideal candidate

The ideal candidate will have the following skills:

Most important is you have a Master's Degree in robotics or similar with focus on complex mechatronic systems and relevant hands on work experience.

Are fluent in C/C++ and Python

Knowledge of ROS system

Has great experience with real robot systems

Has experience with GIT or other version control systems

Is fluent in written and spoken English

Add to these if possible:

Is familiar with UI/UX

Robotics architectural design mindset

Experience with CAD design
know-how in Linux drivers development
Proficient in Linux systems (mainly Ubuntu)
Is familiar with lead software quality assurance, testing and validation
Has experience with parallel processing (GPU/CPU)
Familiar with SCRUM project management

What we offer

In Blue Ocean Robotics we have an international working environment. Right now we have 11 different nationalities, almost all the world's religions represented and an incredible desire and eagerness to develop the best and most value-creating robots to a global market. We have 11 Joint Ventures around the world, and 40+ sales partners. This position is at our HQ in Odense, Denmark.

We respect each other and our diversity. We take pride in integrating expat colleagues in collaboration with Odense Robotics and the International Community Odense.

We are a fast-paced, super dynamic organization with a flat work hierarchy. We have monthly social events, to ensure strong cohesion among each other. Don't take it from this note meet your new colleagues here: <https://goo.gl/BbkLkC>
