

## **EXPERIENCED SOFTWARE SYSTEM DEVELOPER - WITH SOFTWARE ARCHITECT POTENTIAL**

*Would you describe yourself as a skilled and experienced Software Developer? Are you passionate about software architecture on both system and sub-system level? Would you like to develop system software solutions for intelligent metering systems for energy and water consumption in an international Danish company?*

### **Become part of an ambitious System Software team in Kamstrup**

Kamstrup is one of the world's leading manufacturers of intelligent solutions of energy and water consumption with production, administration and development gathered at the headquarters in Stilling, south of Aarhus. Due to our rapid growth, we are looking for experienced Software System Developers to join our System Software team.

As our new Software System Developer, you will be part of the Electricity System Software department with over 50 experienced and professional colleagues, covering scrum masters, full time testers, developers and architects. Together, we strive to create innovative software solutions of the absolute finest quality. Our working model is based on the scrum-model where dialog and continuous sparring practice is evident in solving the daily tasks. You thereby become part of an environment, where we keep on challenging each other in order to reach a higher standard and maximize personal development. In Kamstrup, we are more than 150 Software Developers across the organisation, and we offer you a unique position with a chance to develop your career with us.

### **A job focusing on innovative metering solutions**

In the job as Software System Developer, you become a central player in the development of our system solutions. Here you will primarily be working with technologies such as .NET and C#. It is therefore essential that you have experience within these technologies.

In addition, we work with a wide range of other technologies and tools such as MongoDB, MS SQL, RESTful web services, Jenkins, BitBucket, Git, NUnit, Jira and more. It would be advantageous to have knowledge of some of these, but it is not a requirement.

### **Personality matters**

As a person, you take pride in writing high quality code. You enjoy teamwork and are ready to influence the team's progress with your experience within software development. You are driven by a constant desire to keep developing your skills and deliver better solutions for our customers. It is critical that you work systematically and have an eye for details.

You have an education as an engineer, computer sciences or similar and a minimum of 4-6 years of relevant work experience as Software Developer. We value curious employees and you are the type who gladly engage in and learn from collaboration with colleagues in order to solve a task.

The job requires fluency in written and spoken English. Danish will be an advantage.

### **We offer more than just a job**

We offer you a position in a growing Danish company with a unique chance to influence the development of the future innovative software solutions. You will be a part of a learning environment where sparring and development is in focus, and with great chances to improve your personal skills. Moreover, we offer you a job in a department with a great cooperative culture and the focus on individual responsibility.

We offer flexible working hours and numerous employee benefits, counting a healthy canteen, free fruit, fitness facilities, in-house dental clinic, hairdresser and a free health clinic. Moreover, we have an active employee association.

### ***About Kamstrup***

*Kamstrup develops and manufactures innovative solutions for measuring energy and water consumption.
