Full-stack Developer for trailblazing defence product

Are you passionate about developing software that makes a difference for thousands of soldiers in the field? Are you interested in Java, JavaFX and AngularJS? If so, then seize the opportunity to become a developer in our Defence Department.

Your code will give soldiers vital information

As a Full-stack Developer, you will become a key player in one of our flagship defence products, SitaWare Frontline. The product provides deployed soldiers with an overview of the field and the precise location of troops. Your code will make a difference by helping to ensure effective decision-making. Your job will involve responsibility for a broad spectrum of development assignments which will employ a diverse range of technologies. You'll be responsible for developing new features for SitaWare Frontline and for the continuous improvement of the existing code and development environment. You'll become part of an agile and self-motivated team of over 30 talented colleagues and get the chance to become a scrum master or move into a technical architect role, if you want to go in that direction.

Your duties will include:

- producing quality code that is easy to maintain and understand
- developing new features for SitaWare Frontline
- improving the existing code

Inspiring professional community

At Systematic, our emphasis is on making everything better. We are passionate about making a difference.This is why we dare to challenge and develop ourselves and each other. We share our knowledge about our processes and are always on the lookout for ways to be smarter and develop even better solutions. Together we focus on building a culture in which everyone can make decisions that make sense in day-to-day life.You are challenged on a daily basis, and close co-operation is paramount in ensuring that we make a difference to the world we live in.

Experienced developer and team player

We expect you to have a background in engineering or computer science and to have at least five years' experience in software development. You're also eager to join a highly qualified team working in an agile environment that teaches you something new every day.

You will stand out as being:

- experienced in Java, JavaFX and AngularJS or general Javascript development within a single-page web application
- able to lead your team in specifying and developing the solution
- able to work analytically and to take pride in understanding and solving complex challenges
- willing to continually improve and evolve and to help others to do the same

Furthermore, you are fluent in both written and spoken English.

We work with security-classified projects, and therefore, you as an employee at Systematic need to have security clearance.

To apply for this position please submit your application and CV to: mbu@workindenmark.dk
