

IT SECURITY MANAGER

Do you want to be responsible for IT security in an international company in growth? Is IT security a part of your DNA? Can you develop efficient and secure IT solutions and processes in collaboration with other specialists? Do you have experience regarding implementing best practice principles within IT security?

Become part of Group IT Management in Kamstrup

Kamstrup is one of the world's leading supplier of intelligent energy and water metering solutions with production, administration and development gathered at the headquarters in Stilling, south of Aarhus. Due to our rapid growth, we are looking for an IT Security Manager to join our Group IT.

In the newly created position as IT Security Manager, you become part of the Group IT management team, and you will be referring to our Vice President IT. You will get the managerial responsibility for 2 Security specialists with extensive experience within infrastructure, operations and security. You will be the focal point of day-to-day management of IT security-related tasks, and you will therefore have a broad interface both inside and outside the organization.

IT Security Manager with focus on development and implementation of IT security solutions

As IT Security Manager, you will be responsible for the development, implementation and follow-up of processes and technologies implemented to protect the employees of Kamstrup, information and values.

You will be responsible for:

- Compile a strong IT security strategy, together with the rest of IT management, focusing on minimizing business risks, crisis management, operational stability and employee safety
- Instruct the business in the development and implementation of security processes
- Ensure compliance with legislation
- Run and maintain security activities
- Quality assurance and follow up on security reporting and security incidents

In the job, you can expect 15-20 travel days yearly.

Personality matters

To succeed in the job as IT Security Manager, it is a requirement that you:

- Have a minimum of 5 years' experience from a similar position, with managerial responsibility
- Have relevant certifications like ESL, CISSP, CISM, CGEIT, CRISK or similar
- Have experience with ITIL process implementation and follow-up
- Have knowledge of Lean, six sigma or similar optimization tools

In addition, you have a practical experience in solving security issues in collaboration with colleagues inside and outside Group IT. Therefore, it is important that you have an understanding of business-related issues and manage to communicate and collaborate with the people you interact with - both internally and externally.

As a person, you have a big drive and passion for the IT security area, where you follow the development continuously. You thrive to work performance-oriented and achieve your goals in close cooperation with your colleagues. You are able to see opportunities and are not afraid to challenge existing solutions. In addition, it is natural for you to work structured and detail-oriented.

You are fluent in English – both oral and written. Danish will be an asset, but not a requirement.

We offer more than just a job

We offer you a position in a growing Danish company with a unique chance to influence the development of the IT function. You will be a part of a learning environment where sparring and development is in focus, and with great chances to improve your personal skills. Moreover, we offer you a job in a department with a great cooperative culture and the focus on individual responsibility.

We offer flexible working hours and numerous employee benefits, counting a healthy canteen, free fruit, fitness facilities, in-house dental clinic, hairdresser and a free health clinic. Moreover, we have an active employee association.

About Kamstrup

Kamstrup develops and manufactures innovative solutions for measuring energy and water consumption. Kamstrup is the world's leading manufacturer of advanced and innovative equipment for the district heating sector and is one of the leading European suppliers of smart meters and other equipment for the electricity sector.
