

## EMBEDDED SOFTWARE APPLICATION DEVELOPER

*Do you currently work on embedded SW products? Do you have profound experience with C & C++ based software? Do you dare challenge us creating better solutions? Would you like to work in an expanding international company?*

### **Become part of Technology Communications Group**

Kamstrup is a world-leading manufacturer of solutions for smart energy and water metering. We are experiencing high growth and demand for our products all over the world and therefore, we are looking for an Embedded Software Application Developer who will join our Technology Communications Group.

As our new Software Application Developer, you will be joining a team, who design and maintain connected infrastructure products for our Smart Metering solutions, based on embedded Linux framework. The team is characterized by an open culture, high seniority, profound knowledge and empowerment to act. Furthermore, the team work cross organizational, and interfaces with people at all organizational levels.

### **A software job with exciting challenges**

Global presence in Smart Metering is a corner stone in Kamstrup's strategy and you will play an important role in executing this strategy by creating Software Applications for our connected products being a part of our communication infrastructure solutions. As our products are sold globally, our communication products and solutions require a large portfolio of robust communication technologies all depending on robust software. In addition to that, your approach to and thorough knowledge of robust software solutions for products in volume production is essential.

As you already master the embedded software application environment in C++ & C#, you will on a daily basis work within the range from bug hunt and fixing, to feature level product enhancements and system level analysis.

Our connected infrastructure products, closes the gap between our intelligent meters and the server side applications. Being in the middle requires system understanding/overview, customer level understanding and interaction with people in other domains, which is a part of the job.

### **Personality matters**

You have at least three 3 years' experience within Embedded Software Applications in the embedded Linux environment, and have an degree to support it, most likely a B.Sc. or M.Sc. within software solutions. You work both practically and theoretically with your solutions and find it natural to qualify them in real life situations. Beyond your technical capabilities, you strive for results and dare challenge technology and existing solutions while remaining professional in doing it - all with the goal of securing the technology leadership of the Kamstrup Smart Metering solutions.

As a person, you are a people integrator and you possess an open mindset including a high level of trusts, empathy and communicative skills. You are motivated by working in teams as well as individually and therefore, you work well in both projects and self-managed tasks. While being a team player, you are also ready to take personal responsibility generating results and meet new challenges with a smile and a professional attitude. Based on this, you find it natural to meet people across different organizational levels.

You are fluent in English – both oral and written. Danish will be an asset, but not a requirement.

### **We offer more than just a job**

We offer a newly created position in an international company in growth that values initiative, creativity, and skills. We are striving for creating progress for others by optimizing the needs for regulating the world's energy- and water consumption and balancing the production. Therefore, we offer you a job with responsibility and empowerment to act.

We offer you flexible working hours and many employee benefits, among other a great cantina, free fruit, a fitness-center, in-house dentist, in-house hairdresser and a free health care clinic. Beside of that, we have an active employee association.

### **About Kamstrup**

*Kamstrup develops and manufactures innovative solutions for measuring energy and water consumption. Kamstrup is the world's leading manufacturer of advanced and innovative equipment for the district heating sector and is one of the leading European suppliers of smart meters and other equipment for the electricity sector.*

*Kamstrup has over 1200 employees in more than 20 countries with headquarters in Denmark. Kamstrup has a healthy economy, high growth rates and a strong focus on development of technology and staff.*
