

Software developers for Systematic – recent graduates

Do you believe in freedom with responsibility? And do you want to work with your team building software that makes a difference to core functions in society? We are looking for several software developers to join us in Aarhus, with start of employment as soon as possible.

Get off to an exciting start on your career and seize the opportunity to develop and deliver valuable software solutions that improve the world for our customers within healthcare, defence, the police, public institutions and library and learning.

You create exceptional software

At Systematic, we believe that software - built properly and used professionally - can help create a better life and a better society for all. Regardless of the project you will be working on, you will develop software that removes the complexity and increases the effectiveness and that is easy and simple to use.

We will prime you from the beginning and make sure that you get the courses, tools and the professional sparring and feedback you need to implement the needs of the customer. In your future team, you will assist each other, and there will always be two pairs of eyes on your code.

You should apply for this job if you:

- Want to have a working day where development happens in your project team. Typically, it consists of 6-8 developers with assigned architects, user experience designers and test managers – often in close contact with the customer
- Look forward to Scrum planning, Agile working methods, feature-driven development, collaboration with other developers and participation in decisions regarding architecture

World-class professionalism and development

You will have responsibility, influence, freedom and opportunity to develop yourself along with committed colleagues. We constantly challenge the technology, each other and ourselves to provide the finest result and fantastic software – in close collaboration with our customers.

You will be able to determine where your potential takes you at Systematic, regardless of whether a specialist role or leadership is what interests you. You will be joining an inspiring software house with world-class colleagues. We dare to challenge and develop each other and ourselves, and we constantly discuss our processes and look at how we can develop software even more smartly. Cooperation in the team is based on mutual trust and a passion for creating the strongest solutions for the customers. Together we build a culture that enables everyone to take the decisions that make sense in day-to-day life.

You will have ambitions for both the software and your own development

You are probably a computer scientist, engineer or similar. You are preferably a recent graduate and passionate about applying your technological abilities. Which technologies you will be working on depends on the team and

business unit you will be part of. Because of this, you have the opportunity to work with a wide range of technological solutions and methods, and you are skilled in some of the following technologies:

- Java EE and/or .NET (C#), Groovy, Scala – particularly experience with Java will be an advantage
- HTML, CSS, JavaScript (AngularJS, JQuery)
- SOAP, REST, HTTP, SSL/TLS, TCP/IP
- XML, XSD, XSLT
- jPA, SQL (MSSQL, MySQL, Oracle, Postgres)
- Object-oriented design and design patterns
- Test-driven development, profiling, optimisation
- Continuous integration and deployment, scripting
- Windows and/or Linux operational system

As a person, you are good at collaborating, and you contribute positively to the team dynamics. You are ambitious and are willing to continuously improve and develop yourself towards becoming an independent team player. You work systematically and always focus on the detail. It is the quality of your work that drives you, and you take pride in understanding complex solutions and the challenges of the customer.

You speak and write English fluently.

We work with security-classified projects, and therefore, you as an employee at Systematic need to have security clearance.

To apply for this position, send your application and CV to: mbu@workindenmark.dk
