

# Front End Developer

## DATOS DE LA EMPRESA:

**Nombre:** Digitalist Finland Oy

**Dirección:** Arkadiankatu 2, 00100 Helsinki, Finland

**Website:** <https://digitalist.global/>

**Actividad:** We develop genuine digital turnkey solutions which are recognized globally as innovative and creating concrete business value. We live and breathe a co-creation way of working and delivering results for our clients. Through this, we are able to offer companies much more than hired resources for creating digitalization. With the members of the open Digitalist Network and our employees, all our customers will have an excellent chance to watch, learn and participate in the digital revolution in an unseen way. We operate currently in Finland, Sweden UK, USA and Canada, and serve clients globally through these locations. Digitalist Group is listed on NASDAQ OMX Helsinki Ltd.

## DATOS DEL PUESTO:

**Ocupación:** Front End Developer

**Nº puestos:** 4

**Job Location:** Helsinki and Tampere (Finland)

## DESCRIPCIÓN COMPLETA DEL PUESTO:

As a Full Stack Developer we look to your expertise and advice when choosing the best technologies at the design stage. And when it's time to turn the initial designs into a work of art, you and your developer colleagues will get to work your magic.

We love passion. And your passion should lie in writing stellar code. The programming language of your choice can be Python, Node, Java or Scala and you are no stranger to implementing web user interfaces with HTML, CSS or Javascript. Our agile project teams work across the full development stack and typically use methodologies such as Kanban.

Whether your background is in front-end or back-end, it doesn't matter! We are keen to find technical talent whose eyes light up when they get to build micro-services and smooth user interfaces for web and mobile. You are going to smash this job if you are familiar with cloud infrastructures such as AWS, Heroku or Bluemix as well as designing and implementing APIs and data structures. We also appreciate the ability to make decisions about your daily work and advance your projects without hand-holding. Are you a trustworthy team player who doesn't just pull their own weight at projects but also helps out others and proactively contributes to the whole project team's success? If yes, you might just be the one we have been searching for!

### Requirements:

Solid skills and over 2 years of experience in at least one of our programming languages (Python, Node, Java or Scala)

Experience in working with DOM, JSON and implementing data models

Experience with modern data persistence solutions, for instance relational and NoSQL

Experience in JavaScript, CSS and HTML

Real world experience in RESTful architectures, JavaScript frameworks and tools such as React or AngularJS

Experience with automated unit testing and build tools

Good command of at least one version control tool, preferably Git

Willingness to learn and constantly develop your skills

Ability to communicate your thoughts and courage to bring your ideas to the table

Fluent English skills

**This employment complies with the legislation of Finland.**
