PROCESO DE SELECCIÓN: PRESENTACIÓN DE LA EMPRESA Y ENTREVISTAS, 23/5/2018

We believe in versatility and flexibility and our ambition is to be able to offer our expertise at all stages to develop a product or service. This is possible thanks to our three pillars – Engineering Services, Management Services and Training Services.

Projects go through several stages and you, as the client, should feel secure that we can meet your ongoing needs for specific skills. Our field of services can be summarised in three branch segments - Industry, Energy and Automotive. Himec will soon have twenty years' experience of working in these segments. Over the years we have had the benefit of working with various types of organisations in a range of different sectors, each and every one of them with its own specific requirements. Our principal fields of expertise are in product development, production development, process & plant development, inspection, management systems and QHSE Number of employees: 15. Now we are looking for a:

1°.- Applications Developer (3 posts)

As application developer you will work in our in-house projects developing applications for our innovation projects or supporting customers by creating applications by implementing their requirements. You should be able to analyse and iunderstand system requirements. You will perform those tasks by following agile methodologues and industry proven SW processes. We are looking for passionate people with an open mind who like to work in a rapidly evolving industry in Sweden.

→ **Essential requirements:**

- Minimum Bachelor in Electrical, Computer or Mechatronics Engineering or equivalent.
- Fluent in English, both speaking and written
- European driver license, minimum Class B

→ **Desirable requirements:**

- Planning skills
- SW Process.

- Agile methodologies like Scrum, Kanban, TDD.
- General Software Development knowledge
- Knowledge in Android / IOs development

Mail your CV and personal letter to Ignacio.perez@himec.se (con copia a eures.nordicos@sepe.es);

2º.- SW Engineer(3 posts)

As software engineer you will work in our in-house projects developing our innovation projects in close collaboration with HW engineers and mechanical engineers and also with our customers developing the cars for tomorrow using agile methodologues and industry proven SW processes like ISO26262 and A-SPICE.

We are looking for passionate people with an open mind who like to work in a rapidly evolving industry like the automotive in Sweden.

-> **Essential requirements:**
- Minimum M.Sc. in Electrical, Computer or Mechatronics Engineering or equivalent.
- Fluent in English, both speaking and written
- Driver license B

-> **Desirable requirements:**
- Planning skills
- SW Process like A-SPICE, ISO26262.
- Agile methodologies like Scrum, Kanban, TDD.
- Embedded SW knowledge
- Knowledge in Arduino or Raspberry Pi

    Himec will help with a relocation package.
    We will visit Valencia the 23rd of May to give information about the company and to have interviews on site
