

Puesto de trabajo: **INGENIERO/A ELECTRÓNICO** (Ref. 56465738)

Nº de puestos: 1

Lugar: **BELGICA (OUDENAARDE)**

Fecha: 06/9/2017

OIP (Optique et Instruments de Précision) Sensor Systems is providing high performance optoelectronic solutions for Security, Defence and Space. Our designs are related to image processing, sensor readout, system integration, digital and analog electronics.

Perfil del candidato:

- Nacionalidad de un país de la Unión Europea.
- Master or Bachelor in electronics with several years of relevant experience
- Experienced with schematic entry, Altium Designer is a plus.
- You are familiar with PCB routing and fabrication
- You are competent in implementation of MIL/ESA specifications.
- You have experience with simulation tools for Signal integrity, spice or similar simulation.
- You are hands-on in basic programming languages (C, C++, Python,...)
- You have successfully realized projects in similar environments.
- You are fluent in writing and speaking English.

Funciones:

Your work will vary from realizing power supplies, cabling/harnessing to creating digital electronics with state of the art FPGA and microcontrollers. You will have the opportunity to learn and design these products in assistance with experienced project teams. A project team can be related to a defense or a space projects.

You work with Altium Designer for schematic entry and pcb layout. Follow up, startup and debugging of the product is a part of the job. Your creativity will be appreciated in solving problems. You're responsible for the documentation related to your design. You will be involved in improving our design procedures and methodologies.

Condiciones laborales:

- Contrato indefinido a tiempo completo.
- Salario: 55000 bruto/anual+ group insurance + hospitalization insurance + meal vouchers

Please send your application to OIP NV, Westerring 21, 9700 Oudenaarde, Belgium

or mail it to jobs@oip.be (Chantal Jacob)
