

Radiologist for Northern Denmark

Clinical Diagnostics at North Denmark Regional Hospital in Northern Denmark has a vacancy for a registered medical specialist in diagnostic radiology in the Diagnostic Imaging Department, to start as soon as possible.

Diagnostic Imaging Department in Northern Denmark

The department performs about 46,500 investigations/interventional procedures each year. At present the department employs six radiologists, seven medical secretaries and 22 radiographers/nurses. The department enjoys a close partnership with the other North Denmark Regional Hospital sites and with Aalborg University Hospital, the region's main centre for teaching and medical research.

The Diagnostic Imaging Department is in constant development and is fully digitalised, with EasyViz, RIS and PACS. We have two 128-slice CT scanners – a Philips and a Siemens – and three ultrasonography devices.

We perform outpatient, inpatient and acute investigations. We also have a Siemens Magnetom Avanto 1.5 T MRI scanner, which we use for scheduled inpatient and outpatient investigations.

The position offers a busy and varied working day in close collaboration with friendly, reliable and highly competent colleagues in an open, informal environment. There are excellent opportunities to influence your own working arrangements and to decide how you manage your responsibilities.

This is a position that involves on-call duties. The Diagnostic Imaging Department is key to the investigation of patients, developing cancer care pathways and supporting the hospital's function as an acute hospital. On-call duties can be provided from home, and home office equipment can be provided to facilitate this.

What we expect:

- You are a registered medical specialist in diagnostic radiology, with the potential for future appointment as a consultant
- You have considerable experience in diagnostic imaging and relevant professional in-service training
- You will contribute to the department's daily operations and activities, provide advice for clinical departments and practising doctors, and participate in quality assurance and quality development
- You have good communications skills, work well in a team and are also able to work independently
- Is ready to relocate to Denmark and learn the language

What we offer:

- Flexible working hours, taking account of the

workplace and your wishes

- A good working environment
- A friendly and sociable team of co-workers
- Permanent, full time position with an attractive payment
- Professional challenges with opportunities for research
- Danish language course in Denmark with full payment
- Assist your partner with job search

Conditions of employment: Salary and terms of employment comply with the current collective agreement between the Danish Regions and the Danish Association of Medical Specialists.

Why choose Northern Denmark?

- Good work/life balance. We offer a 37-hour working week, a generous pay package and 5 weeks paid annual holiday.
- Although taxes are high in Denmark, so are the salaries, which means your take-home pay will still be more than you would make in most other European countries. Typically, your starting salary as a medical specialist will be around DKK 50,000 + an attractive pension pr. month before tax. After tax, you can expect to receive approx. DKK 30,000 + pension.
- You will receive full salary from day one, even though you will be spending most of your time learning Danish for the first few months.
- Continuing education – as a doctor you are entitled to annual, employer-funded continuing education. There are also good opportunities for sub-specialisation in cooperation with the region's university hospital in Aalborg.
- Research. We do not consider research to be an optional extra, but something all our medical specialists are expected to engage in.
- Housing: You can rent low-cost housing through the hospital, or we can help you find a place to rent or buy in the private market.
- Relocation: We will help you and your family with practical matters and support your integration into the local community. If relevant, we will also do what we can to help your spouse find work.
- You will have plenty of opportunity to enjoy North Denmark's beautiful scenery. The tip of Denmark's Jutland peninsula is surrounded by water on three sides. The unique quality of light that this creates is celebrated in the works of the world-famous Skagen Painters of the late 19th century. Northern Jutland is also famous for its excellent surfing conditions at Cold Hawaii, and for its rich bird life. Northern Jutland is, quite simply, a great place to pursue outdoor activities, whether you enjoy white, sandy beaches, mountain biking, kitesurfing or something else entirely. For more information please visit: www.visitnordjylland.dk
- North Denmark has a varied and flourishing cultural life, with museums, cultural centres, concert venues and a wealth of arts and crafts producers. The public libraries are free of charge and open to everyone. In addition to lending out books of all kinds, they stage a wide range of interesting talks and organise a whole host of events for children.

How to apply

Please send your detailed application documents (curriculum vitae, formal recognition as a medical specialist and other relevant documents which reflect your professional career) along with a motivation letter health@workindenmark.dk with copy to euress.nordicos@sepe.es **SUBJECT: NORDIC DAYS**

MEDICAL SPECIALISTS

We will then contact you as soon as possible. (Dead line 31/10/2017)

. If you have any questions, please do not hesitate to contact Claus Bang Møller, email cba@workindenmark.dk, telephone +45 72 22 33 81

What happens if I am interested in the job?

- If both parties are interested in taking your application to the next step, we will invite you and your spouse on a short trip to Denmark to visit the hospital and its surroundings. On the trip, you will be able to look at different types of housing, visit childcare facilities or schools and get a better picture of life and work in Denmark.
- If after the visit both parties are still interested in continuing the relationship we will agree employment terms and draw up a contract.
- Typically, you will be able to start working in Denmark as soon as you are able to move you and your family to Denmark, and you have been formally approved by the Danish health authorities.

- If you do not have any Danish language skills, you will spend the first few months learning Danish. Typically, you will start by learning Danish 80-90% of the time and working 10-20% of the time. As you begin to master the language, you will be working more, and having fewer Danish lessons. We expect that after 3-6 months you will be fluent enough to cut the Danish lessons down to nothing or nearly nothing. You will receive full pay throughout the entire period.

North Denmark Regional Hospital – for a wide range of medical services and excellent quality of care

North Denmark Regional Hospital is a combined hospital made up of facilities in five towns. We operate two acute hospitals, in Hjørring and Thisted, and one hospital providing medical care and elective surgery in Frederikshavn. Neurological rehabilitation services are provided by Neuroenhed Nord at locations in Frederikshavn and Brønderslev, while Skagen Gigt- og Rygcenter provides rehabilitation for patients with arthritis and back pain.

We are able to provide the vast majority of hospital treatments required by patients in our local area – and we are constantly developing our capabilities in the areas of investigation, treatment and care, so that we are always among the best-performing hospitals for the specialisations we cover.

We aim to be at the forefront of medical advances. For that reason, we have our own research unit and work closely with Aalborg University Hospital, the region’s main centre for teaching and medical research. Our goal

is to be attentive to and support the needs and wishes of patients and their families.

We are a flexible employer that sees you as both a colleague and a person. We know that you can perform at the highest level only if you enjoy your work and your workplace.

The Danish health care system

Denmark is divided into five regions. They are in charge of running hospitals and (through collective agreements) managing the general practitioner system. The local government is in charge of providing prevention and healthcare services to the public. Hospital treatment is free of charge for residents in any region of Denmark, and emergency treatment is available to any person in need. You find further information about the Danish healthcare system at Wikipedia > Healthcare in Denmark
