

MALTA — 5 Quality Control Analyst

Company: APL Swift Ltd.

The role's objective is to perform testing of finished goods according to specified procedures and in compliance to EU GMP. Following is a summary of the tasks and responsibilities:

- To execute product testing as per the approved methods of analysis.
- To input generated laboratory data in LIMS.
- To prepare, standardize and label stock solutions and laboratory reagents as required.
- To routinely monitor and analyze the water supply according to Company procedures.
- To ensure that all equipment, apparatus and premises of the QC Department are functional and suitable for their intended use, by performing maintenance and calibration as instructed. Apparatus should be handled in the proper manner and not in a way which may be detrimental to its function.
- To work out calculations pertaining to analysis and produce the relevant documentation in association always in compliance to EU GMP.
- To ensure proper filing and easy retrieval of all documentation and records pertaining to the QC Department.
- To assist the immediate superiors in problem solving exercises and other exercises aimed at improving quality and efficiency.
- To perform laboratory equipment qualification and calibration accordingly to a predetermined schedule.
- To perform method validation as required.
- To maintain records of stocks of reagents, equipment spares and reference standards in such a way as to report when re-ordering is due.
- To follow and document (record) precisely all activities as described in the relevant Standard Operating Procedures (SOPs), Test Methods and Protocols.
- To perform all duties as laid down and any additional duties as may be allocated from time to time by the QC Manager or delegate in a proper professional manner and in the best interest of APL Swift Services (Malta) Ltd.
