EMBEDDED SOFTWARE DEVELOPER, AUTOMOTIVE

Segula Technologies AB is part of Segula Technologies Group - a global technology company with 11,000 employees in 26 countries. The headquarters of Sweden is located in Gothenburg with more than 170 technical engineers divided in five sectors: Automotive, Energy, Industry, Medical and Naval. Together, we are engaged in a number of key projects. With extensive knowledge and experience, we are now developing future technologies.

As consultant at Segula Technologies you get the opportunity to gain experience from different areas and building a large network of contacts. You will be working in a creative environment with well-known products and companies in Sweden. We offer a safe employment with good benefits and room for personal development. Segula has the possibility to help you with lodging until you find a place to stay of your own.

Job description

As an Embedded software developer you will be working in the forefront of technical development in the automotive industry. Main areas are systems within active safety, autonomous driving, infotainment and electrical driveline. Coding for applications and distributed systems. You will be taking part in an agile environment using Scrum method. Continuous improvements will be key.

Your profile

We think that you are an open and humble person who likes to share knowledge and life experience as well as listen to others. We want you to develop as a person and therefore be open to new influences. You want to have fun and to do those things that make you flourish. We believe you have a genuine interest in software development. We want you to be able to communicate well in English both verbally and in writing, preferably also in Swedish or at least willing to learn. You will need to be able to work with other people, therefore you need to have the ability to communicate clearly and take part in team work in some level.
