## Junior Design Engineer

**inContext** was founded in 2006 and we have, since the start, focused on building long term relations with our clients within the electrical equipment, automotive and home appliances industries. We provide consultancy services of experienced and dedicated consultants who support our clients in future defining projects. For the last two years, we have been awarded Dagens Industris Gasellföretag and Veckans Affärer's Superföretag.

As we are rapidly growing our business, we are always looking for driven and experienced people to join our team and support our complex assignments.

As we are rapidly growing our business, we are always looking for driven people to join our team and support our complex assignments. We have available positions within our three focus areas. For more information regarding our focus areas please read more [here](#).

We are now looking for newly graduates and/or Junior Design Engineers who are eager to display their interest and knowledge in a practical setting, where you will be given a solid platform and foundation on which you can develop and nurture your future career, based on your interest, drive and passion. You will get the support and introduction that you need in order to develop technically in the assignment. Initially, you will go through our onboarding process, where experienced inContext consultants will guide you and provide you with the training and tools you need for a specific group and role, for example, CATIA, Enovia or our client's own systems.

To succeed at inContext, you should have the ability to act independently and understand new information easily. You are used to seek new information and you are not afraid to ask for information when necessary. English and Swedish proficiency is mandatory. Knowledge of CATIA V5 is an asset, but not a requirement. As our client is in the automotive industry, it is imperative that you have a genuine interest of vehicles, a technical understanding and a drive to develop further.
